FLEX

Laser measuring technology

ALC 311

Order no. 311.286

Technical attributes	ALC 311
Precision	± 3 mm/10 m
Self-levelling range	± 3,5 °
Operation duration	15 h
Visible laser diodes	3 x 635 nm
Max. working range	20 m
Laser class	2M
Weight	0,7 kg

Standard equipment	
Wall and tripod console	1 piece
Magnetic target panel	315.281
Laser goggles	312.134
Batteries 1,5 V (AA) for measuring device	3 pieces
Padded carrying bag	1 piece

Self-levelling cross-hair laser

- Three visible, individually switchable laser lines
- Cross-laser projection
- Vertical line 90° to cross laser
- Self-levelling with robust magnetic damping
- Optical and acoustical warning signal when self-levelling range is exceeded
- Transportation lock
- Ideal for interior finishing: suspended ceilings, aligning metal studs in drywall construction, fitting doors and windows, transferring heights, levelling tiles, flush fittings, etc.
